

Title: “Economic Development in the Digital Age”

Abstract:

The Massachusetts Technology Collaborative is a unique public agency that supports the vibrant, growing innovation economy across Massachusetts. After 35 years, it is repositioning its human and financial capital to address opportunities and challenges in the new digital era. Working with and investing in universities is one of MassTech’s hallmark accomplishments and the MOC is an important asset in this repositioning. A review of MassTech’s four ‘top of house priorities’ – (#1) Cybersecurity; (#2) Digital Health; (#3) the Internet of Things & Robotics; and (#4) Advanced Manufacturing – makes this case.

Presenter: Tim Connelly, Executive Director, Massachusetts Technology Collaborative
