

Harvard Dataverse and the MOC

Current Setting: Harvard Dataverse on AWS

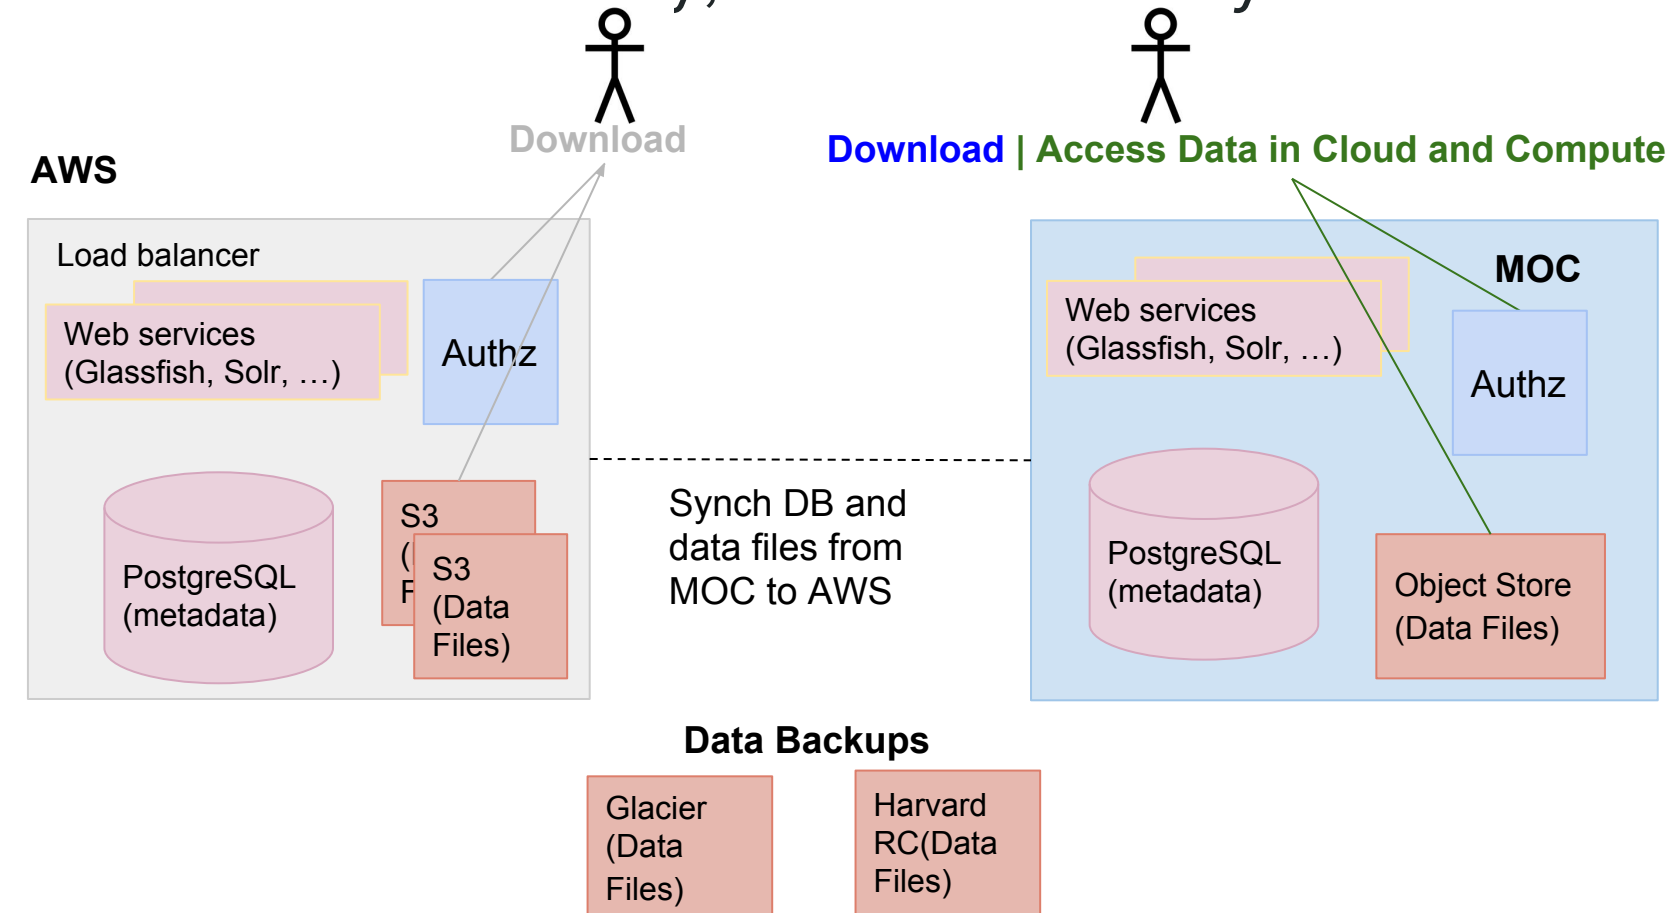

Phase 1: Data Files on MOC

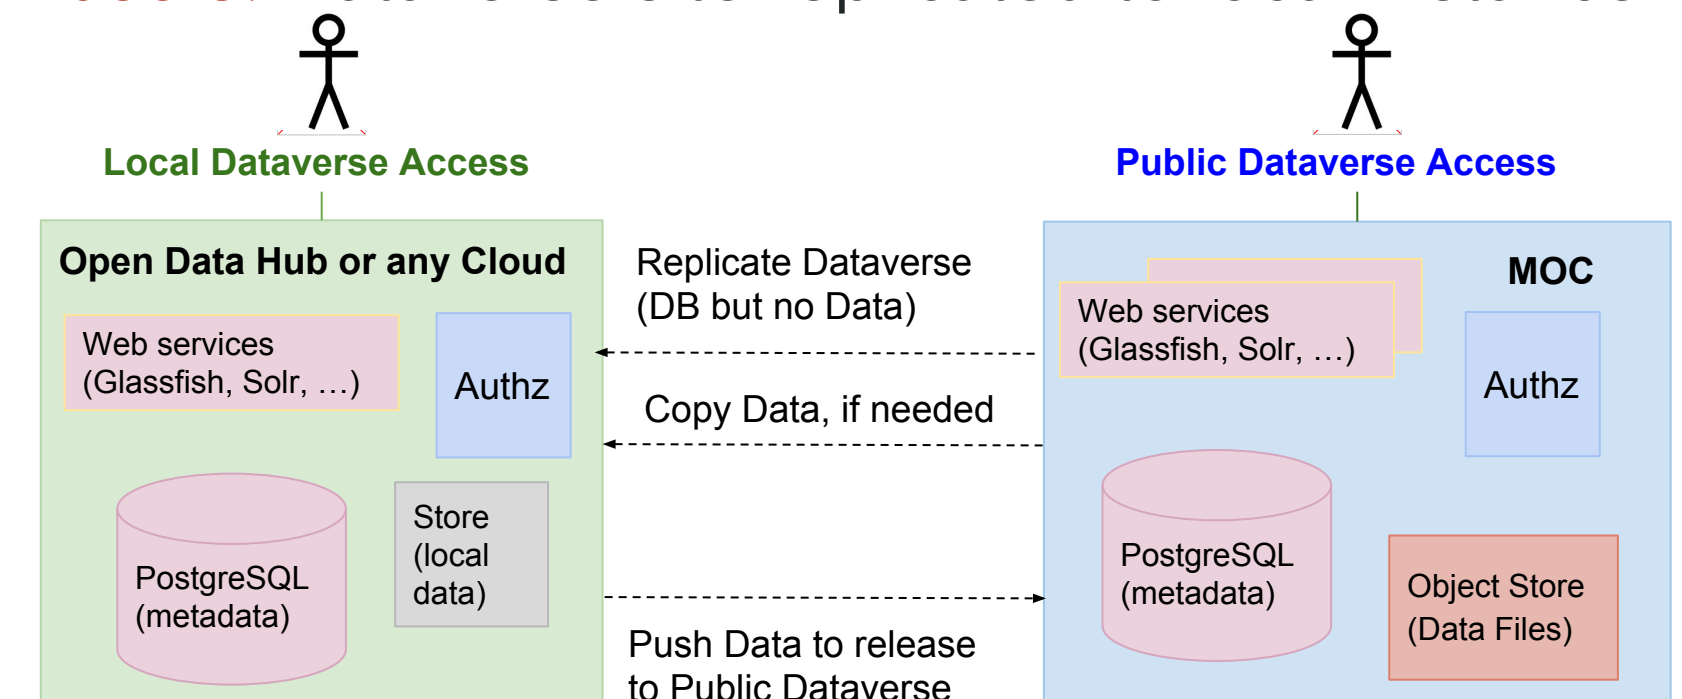

Data scientist can access Dataverse data on MOC.
Dataverse on AWS is the primary site.

Phase 2: MOC Primary, AWS Secondary

Data scientist uses full Dataverse site on MOC to access data.
Dataverse on AWS is the secondary site.

Phase 3: Dataverse site replicated to local instance

Data scientist can replicate a Dataverse site on Red Hat Open Data Hub (or another cloud), use it locally, and pull/push data from/to Dataverse site on MOC, as needed.
